PROJECTS

Personal Website This is basically my personal website. In this project I have used Html,Css,Java Script and Bootstrap for building the website and I have used SQL for data base and PHP.	06/2020 – 09/2020
Web Scrapping This is an Automation project using python and selenium where we find the Real-time price comparison from multiple eCommerce websites of a product and we push the notification to the user to his mail.	03/2021 – 06/2021
Resume Maker This is a resume maker using Java script. We can make a professional resume by entering our details and we can download it in pdf form and we can even send it to mail from the website	11/2021 – 04/2022
Pickup This is a team project and I am working in back end and acting as a Team Lead. This is a car pooling app . We are using MERN frameworks and API.	06/2022 – present
